World Day of the Sick 11th February, Feast of Our Lady of Lourdes

"The past year has been an extraordinary one. As a deadly and disruptive virus circled the world, we became more acutely aware of the importance of healthcare provision and the contribution of those working on the frontline. Pope Francis, in a message for the World Day of the Sick says it provides an "opportunity to devote special attention to the sick and to those who provide them with assistance and care both in healthcare institutions and within families and communities".

He emphasises that sickness makes us very aware of our own vulnerability, our need for the care and assistance of others and our dependence on God. Illness is experienced at more than just a physical level. It can also be accompanied by fear and bewilderment, particularly, when we are faced with our own powerless. Sickness normally raises questions about the meaning of life which we bring in faith before God.

The Pope entrusts the sick, healthcare workers, and all those who assist the suffering to the care of Our Lady.

We pray for those who are sick, for all who work in the medical profession, and for an end to the pandemic." Bishop Michael Router
